

# SolarArk Advantage

## Australia's Highest Performing Solar Hot Water Systems

- Verified by Sustainability Victoria performance listings- Evacuated Tube
- Verified by Clean Energy Regulator STC data for Evacuated Tube product

## Better By Design

- SolarArk's High Performance and reliability is no accident. We know that to be better it requires "Intentional Superiority" in Materials and Design Method

## Save Up To 40% More with SolarArk

- Evacuated Tube Technology will produce more FREE hot water from the sun
- Will produce up to 40% more hot water than flat panel technology

*15 Year  
Warranty*

## Australia's First 15-Year Warranty

- With the security of uncompromising quality, SolarArk was the first to offer a 15-Year Warranty on the Evacuated Tube Solar Collector and stainless frame

## Over 20,000 systems sold in Australia

- SolarArk has been a mainstay of the Solar Hot Water industry for many years
- SolarArk has become a name associated with quality, reliability and trust

*Australian owned  
and designed*

## Proudly Australian Owned & Designed

- SolarArk is solely Australian owned
- SolarArk Evacuated Tube Systems have been designed by SolarArk

*Performance  
Quality*

*Warranty  
Service*

# SolarArk Advantage

## Better Technology for Cloudy Days

- No heat loss thru the evacuated glass layer allows ALL UV travelling thru the cloud layer to be harnessed and stored effectively as heat energy in the tube

## Superior Strength Against Hail Damage

- SolarArk exceeds Australian standards.
- Cylinder deflects hail rather than aggressive rebound

## Less Weight on Your Roof

- SolarArk tubes weigh up to 115kgs on the roof
- Others High Line Flat Panel systems can weigh up to 650Kgs on the roof

## Low Maintenance

- Self Cleaning. No mould build up, ensuring no performance drop-off
- Tubes do not get hot on outer glass surface = no cooking effect

## Easy Tube Replacement

- SolarArk Evacuated Tube System are modular with easy replacement
- No plumbing requirements to replace a tube. Can be DIY

## 5-Hours Longer Hot Water Generation Per/day

- No reflection = 2.5hrs more per morning & 2.5hrs more per afternoon
- More linear solar collection thru the entire day than flat panel systems
